Re: Track Limits

Date: November 4, 2021

Track limits are defined in Article 19.3 of the 2021 FR Americas Championship Sporting Regulations with adjustment per the Race Director during the Drivers' Meeting. The track limit is now defined as the outer edge of the white and red curbing. And driver who does not have at least one tire on the white and red curbing may be penalized. All other aspects of 19.3 remain in effect.

During the practice session, drivers will be warned if they exceed track limits. Excessive violators may be penalized which could include a drive-thru penalty.

During qualifying and race sessions, drivers' lap times may be disallowed if they exceed track limits.
